

## Transformations on Parent Functions

For each graph provided below, state the parent function. Then state what happened to each of the parent functions in your own words – did the parent function move left/right/up/down, flip, stretch or compress – to the best of your ability. Lastly, state the domain and range of the transformed function (of the graph given to you) in set-builder notation. The scale on both axes is one unit.

<p><b>1.</b></p>  <p>Parent Function:</p> <p>Transformations: What happened to the parent function?</p> <p>Domain:                  Range:</p>	<p><b>2.</b></p>  <p>Parent Function:</p> <p>Transformations: What happened to the parent function?</p> <p>Domain:                  Range:</p>	<p><b>3.</b></p>  <p>Parent Function:</p> <p>Transformations: What happened to the parent function?</p> <p>Domain:                  Range:</p>
<p><b>4.</b></p>  <p>Parent Function:</p> <p>Transformations: What happened to the parent function?</p> <p>Domain:                  Range:</p>	<p><b>5.</b></p>  <p>Parent Function:</p> <p>Transformations: What happened to the parent function?</p> <p>Domain:                  Range:</p>	<p><b>6.</b></p>  <p>Parent Function:</p> <p>Transformations: What happened to the parent function?</p> <p>Domain:                  Range:</p>
